

# INTERNATIONAL ENGINEER REGISTER

The International Engineer Register is essentially the same as the APEC Engineer Register. It is a benchmark to include all economies of the world that share the same objectives. It was the initiative of Engineer Mobility Forum (EMF), originally mooted by members of Washington Accord Countries. The Institution of Engineers, Malaysia signed as a signatory to the EMF Agreement on 25 June 2001 in South Africa. The other economies in the signatory are Australia, Canada, Hong Kong (China), Ireland, Japan, Korea, New Zealand, South Africa, United Kingdom and the United States of America.

## QUALIFICATIONS FOR THE REGISTRATION

To be eligible for the entry into both the registers, Malaysian Engineers must:-

- a) Be a Corporate Member of the IEM and Registered Professional Engineer under the Registration of Engineers Act, Malaysia;
- b) Have completed an accredited or recognised engineering programme, or assessed recognised equivalent; and
- c) Have gained a minimum of seven years practical experience since graduation;
- d) Have spent at least two years in responsible charge of significant engineering work;
- e) Have maintained their Continuing Professional Development at a satisfactory level.
