

PREFACE

This directory, which forms a database of the current members of the Institution, is once again presented. As has been the practice, the names of the members of various disciplines and grades are listed. The names of the members of various categories have been updated until June 2008.

There is an increase in the growth of membership indicating the Institution is able to attract the young and old. The upward trend will likely remain so, as long as each and everyone of us play our roles wholeheartedly. With greater numbers, we become a voice to be heard and to be reckoned with. We become more visible within the society at large, adding values, wherever warranted, to the decision making process in nation building.

As you may have noticed, we have yet to incorporate all the pertinent information to enable each listed name to be contacted. Some who wish to do so may inform us so that the list can be more beneficial, widening your contacts in the fraternity. Nevertheless, being listed means that you are being recognised, thus helping to nurture and sustain your sense of belonging to an esteemed organisation, the Institution of Engineers, Malaysia.

Again, my sincerest wish is to get more feedback on ways to improve this Directory. Keep those comments coming.

Regards.

Engr. Prof. Dr Ruslan bin Hassan, F.I.E.M., P.Eng.

Chairman,

Standing Committee on Information and Publications
